Monitoring**

- ❑ **Risk Assessment:** Readily identify those at risk of recidivism, with actionable data on mental health conditions, substance abuse history, and medical needs; coupled with demographic information.
- ❑ **Treatment Planning:** Quickly analyze health records and historical data for intervention and treatment strategies that get results.
- ❑ **Program Evaluation:** Automate the tracking of data that permits your teams to readily identify the effectiveness of the programs inmates are enrolled in.
- ❑ **Continuity of Care:** Links discreet inmate health care needs to service provision in the community.
- ❑ **Resource Allocation:** Have actionable data regarding utilization patterns of the population for real time allocation of resources.
- ❑ **Compliance Monitoring:** Ensure adherence to national standards, track critical metrics, and address compliance gaps.
