

**Early Detection  
and Intervention**

**Evidence-Based  
Decision Making**

**Continuity  
of Care**

**Compliance  
and Reporting**

**Cost  
Management**

**Population  
Health Management**

**Quality  
Improvement**

- ❑ **Early Detection and Intervention:** Quickly identify individuals at high risk allowing for prompt treatment and prevention of hospitalization.
- ❑ **Evidence-Based Decision Making:** Provides actionable data that leads to cost-effective healthcare outcomes.
- ❑ **Continuity of Care:** Links discreet inmate health care needs to service provision in the community.
- ❑ **Compliance and Reporting:** Readily demonstrate adherence to standards, track key metrics, and fulfill reporting obligations.
- ❑ **Cost Management:** Easily monitor healthcare costs and identify opportunities for cost savings without compromising the quality of care.
- ❑ **Population Health Management:** Identify prevalent health conditions, track disease trends, and develop targeted interventions to improve population health outcomes.
- ❑ **Quality Improvement:** Analyze data on clinical outcomes and adherence to best practices.
